CLASS 08 / OCT 13

SUPPORTED PRACTICE

ARRAYS 1 AND 2. NO NEW TOPIC. FIX IT BEFORE SUNDAY.

NOTHING DUE

UPLOAD CLOSES SUN OCT 18, 11:59 PM

WHAT THIS CLASS IS FOR

A working session. Every sheet you bring gets looked at; nothing new is taught.

BRING

- All three array sheets: repetition, conditional patterns, application
- Anything still open from 1, 2.1, 2.2 and 3.1
- The editable files, not screenshots of them

WE CHECK

- Loops, counts and spacing in the 1D, 2D and 3D arrays
- if/Switch patterns in 2D, then the same rules in 3D
- That the module resizes to its cell when counts and spacing change

YOU LEAVE WITH

- A list of what to fix, in order
- Captions that name the rule in plain words
- Files that reopen and reproduce every sheet

SMALL COUNTS FIRST. A PATTERN YOU CANNOT CHECK BY EYE IS NOT CHECKED.

CHECK EVERY LINE BEFORE YOU UPLOAD

Open each file cold. If a step below fails, that is what to fix today.

✓	Change a count or a spacing: every array rebuilds, the module fits its cell, totals stay right
✓	Each of the four patterns names its rule and what happens when it is true and false
✓	One modulo rule and one index-driven parameter change are among the four
✓	The application reads as one object, with a view that explains module and pattern
✓	Materials noted, textures packed, and the file reopens showing exactly the sheets

IF YOU HAVE TO MOVE SOMETHING BY HAND AFTER CHANGING A COUNT, IT IS NOT PARAMETRIC YET.

THE MID-SEMESTER UPLOAD

Everything through Arrays, in one upload, by Sun Oct 18, 11:59 Pm. This is the record for the midterm grade.

GSM	Graphic Standards Manual	**5%**
P2a	CSG - an architectural object as instructions	**10%**
P2b	3D printing - from model to layers	**5%**
P3a	Descriptive geometry - build a reusable module	**10%**
P3b	Arrays - repetition, patterns and architecture	**10%**

NOTHING IS DUE TODAY. SUNDAY IS THE DEADLINE, NOT A SUGGESTION.

BEFORE NEXT CLASS

UPLOAD	Sun Oct 18, 11:59 Pm. Everything through Arrays. After that the midterm grade is computed from what is in.
NEXT	Week 9 — Oct 20: Attractors. Distance replaces the index as the rule. P3c and P3study issued.
PANEL	Bring your 3.1 panel as a node group with one parameter exposed. Next week an attractor drives it.
FILES	Save a copy of the uploaded files before you keep working. The upload is the record.
